

Objectives of the course

The training in pediatric dermatology is recognized as limited or insufficient in most Medical Schools. The educational needs are important in this field, and the EADV together with the ESPD will provide a training with the contribution of recognized experts to cover the disorders which are commonly encountered in daily practice and need specific training for diagnosis and management. The programme fits this aim. At the end of the event, important genetic, infectious and chronic inflammatory disorders should be better recognized with general principles of management to be implemented in practice.

Participants receive

- A free of charge course with interactive experience
- Educational material, certificate of attendance, free catering during the course

Course chairs

Local organizing committee

Prof. Dr. Ayse Deniz Yucelten,
Prof. Dr. Osman Kose

International Scientific Committee

Prof. Regina Foelster-Holst (Kiel, Germany)
Prof. Daniel Hohl (Lausanne, Switzerland)
Prof. Alain Taieb (Bordeaux, France)
Prof. Umit Uksal (Istanbul, Turkey)
